

soya lecithin

the lecithin specialists

Based on simple and viable business ethics, we, at Process Enterprises, manufacture, supply and export varied products for industrial usages. Our products such as [Soya Lecithin](#), [Soya Protein](#), [Soya Flour](#), [Soya TVP](#), etc, are made from the finest quality raw material and under stringent conditions. Thus, they are durable, reliable and 100% safe to be used.

Established in 1996, Process Enterprises is backed by a team of experienced Industrialist and Promoters. The management team has an average of 25 years of domestic and international industrial experience and a strong history of business, academic and technical accomplishments.

Through its subsidiaries and recent acquisitions, Process Enterprises is also engaged in supplying Raw Materials for diverse industries like feed processing, paints, printing inks, rubber chemicals, explosives, leather tanneries, aqua feed, cattle feed, poultry feed, etc.

Our team works in close co-ordination with our clients and constantly engaged in research to offer better products. Besides, our infrastructure is well equipped with advanced facilities to back our operations smoothly and take care of any kind of specifications for the bulk orders. Our unwavering commitment has won us adulations from all over the world and enabled us to win a huge list of patrons.

Our Strengths:

- We have integrated modern facilities in our manufacturing process to ensure impeccable production
- Our products are benchmarked with multiple quality assurance test and adheres to the international norms of quality
- We can also customize products as per the specifications of our clients
- We have a proficient team and a sound infrastructure to back our operations
- We manufacture products keeping in mind the stipulated time frame
- We offer products at market leading price

Food Additives and Ingredients

We offer several food additives and ingredients which are extensively used in manufacturing of products like biscuits, chocolates, confectionery products, chewing gums, caramels, bakery products, margarine, bread improvers, health food, meat products, etc, to name a few.

Some of these additives we offer can be classied based on it functional properties as: Emulsifiers, Anti-Oxidant, Thickeners, Stabilizers, Glazing Agents, Humectants, Flour treatment agents, etc.

soya lecithin

Soya Lecithin

Process Enterprises is one of the leading manufacturer and supplier of **Soya Lecithin** in India and across the Globe.

Soya Lecithin is widely used in several industries including: Biscuits, Chocolates, Confectionaries, Bakeries, Food Products, Margarine, Cosmetics, Pharmaceuticals, Paints/Printing Inks, Veterinary Medicine, Feed Products, Aqua Feed, Cattle Feed, Poultry Feed, Leather Chemicals, Explosives, Adhesives, etc.

We offer premium **Non-GMO Soya Lecithin (certified Non-GMO)**:

- **Non-GMO Food Grade Soya Lecithin**
- **Non-GMO Pharma Grade Soya Lecithin**

We offer Standard **Soya Lecithin**:

- **Food Grade Soya Lecithin**
- **Pharma Grade Soya Lecithin**
- **Aqua Feed Grade Soya Lecithin**
- **Cattle Feed Grade Soya Lecithin**
- **Poultry Feed Grade Soya Lecithin**
- **Paint Grade Soya Lecithin**
- **Printing Ink Grade Soya Lecithin**
- **Explosive Grade Soya Lecithin**
- **Commercial Grade Soya Lecithin**

soya lecithin

Soya Lecithin Powder

Soya Lecithin Powder is made from 100% **Non-GMO Soya Lecithin Liquid**. It is a light yellow to brown colored powder with a typical soyabean odor.

Soya Lecithin Powder is a multi-functional additive and it used in a variety of industries including:

- Food/Bakery/Confectionery - as an emulsifier, thickener, stabilizer, preservative, moisturizer, emollient, etc.
- Cosmetics - as an additive for moisturizers, makeup, shampoos, conditioners, body washes, lip balms, etc.
- Medicines -
 - helps lower cholesterol
 - improves memory and cognitive functions
 - improves cardiovascular health
 - helps in absorption of Vitamins A, D, E, and K
 - helps in muscle control, and brain function
 - promotes overall health and physical performance
- Feed manufacturing - as an emulsifier, thickener, stabilizer, preservative, moisturizer, emollient, etc.

soya lecithin

Soya Lecithin Granules

Soya Lecithin Granules are similar to **Soya Lecithin Powder**. The difference between the two is of the appearance.

Soya Lecithin Granules, as the name suggests, is **Soya Lecithin Powder** in granular form. The properties and functionalities of both these products are similar. Due to its granular form, **Soya Lecithin Granules** find extensive usage in Pharmaceuticals as it can be applied to many drugs directly.

- Food/Bakery/Confectionery - as an emulsifier, thickener, stabilizer, preservative, moisturizer, emollient, etc.
- Cosmetics - as an additive for moisturizers, makeup, shampoos, conditioners, body washes, lip balms, etc.

soya protein

Soya Protein

Process Enterprises offers premium quality **Soya Protein**, which is made from finest quality dehulled and defatted **Soya Flakes**.

Soya Protein has long history of use as an emulsifier and a texturizer in a variety of food and meat products. Popularity of **Soya Protein** has increased in recent past due to its immense health benefits. **Soya Protein** can help to prevent heart diseases as it has very low fat and is free from cholesterol.

Due to its nutritional values, **Soya Protein** is used in a variety of Food and Meat preparations. It is also extensively used in Pharmaceutical and Health Food manufacturing.

We offer following types of **Soya Protein**:

- **Soya Protein Isolate**
- **Soya Protein Concentrate**
- **Soya Protein (50%)**
- **Feed Grade Soya Protein**

Food Additives	Feed Additives	Paint Chemicals	Pharma Ingredients	Other Products

soya tvp

Soya TVP

Textured Soya Protein, also known as **Soya TSP** or **Soya TVP**, is made from **Soya Protein** by giving it some texture.

Soya TVP is available in different forms, including Chunks, Nuggets and Granules. **Soya TVP** is known to retain its structure when hydrated. When Hydrated, **Soya TVP** gives an appearance which is similar to that of processed meat. Therefore, it can be used as a meat replacement or can be added to meat.

We offer **Soya TVP** of following 3 types:

- **Soya Nuggets**
- **Soya Chunks**
- **Soya Mince**

Soya TVP	Zinc Oxide	Zinc Oxide	Soya Flour	

soya flour

Soya Flour

Soya Flour is made from the De-Oiled Cake of the Soybeans. **Soya Flour** has applications in several products like bakery, confectionery, candy, cakes, ready to eat food, instant food mixes, meat products, pasta/macaroni, burger patties, breakfast bars and cereal, etc.

Soya Flour is normally added to increase the protein content of the food items. **Soya Flour** also acts as an emulsifier in dough based products as it makes the dough smoother, uniform and less sticky. Adding **Soya Flour** improves the texture and also increases the shelf life of the finished products.

We offer premium **Non-GMO Food Grade Soya Flour (certified Non-GMO)**:

- **Defatted Soya Flour Toasted**
- **Defatted Soya Flour Untoasted**
- **Full Fat Soya Flour (Enzyme Active)**

We offer **Feed Grade Soya Flour**:

- **Poultry Feed Grade Soya Flour**
- **Cattle Feed Grade Soya Flour**
- **Aqua Feed Grade Soya Flour**

In addition, we also offer a special industrial grade of **Soya Flour** which is mainly used in adhesives, tapes, explosives, laminates, plywood manufacturing etc.

soya lecithin

Soya Grit

Soya Grit is made from the De-Oiled Cake (Food Grade Soya Flakes) of the Soybeans. **Soya Grit** has applications in several products like bakery, meat products, pasta/macaroni, burger patties, breakfast bars and cereal, etc.

Soya Grit is also extensively used to manufacture **Soya TVP**.

We offer premium **Non-GMO Food Grade Soya Grit (certified Non-GMO)**:

- **Defatted Soya Grit Toasted**
- **Defatted Soya Grit Untoasted**
- **Full Fat Soya Grit**

In addition, we also offer a special feed grade of **Soya Grit** which is mainly used in manufacturing of poultry feeds and cattle feeds.

Soya Flakes

Soya Flakes are also known as De-Oiled Cake (Food Grade) of the Soybeans. **Soya Flakes** are used in several Food and Meat Processing applications as well as in burger patties, breakfast bars and cereal, etc. **Soya Flakes** are also used to manufacture Soya Sauces of different kinds.

We offer premium **Non-GMO Food Grade Soya Flakes (certified Non-GMO)**:

- **Defatted Soya Flakes Toasted**
- **Defatted Soya Flakes Untoasted**

In addition, we also offer a special feed grade of **Soya Flakes** which is mainly used in manufacturing cattle feed and poultry feed products.

soya lecithin

Lecithin Oil

Process Enterprises offers **Lecithin Oil**, which is one of the main additives used in manufacturing of cattle feed and poultry feed products.

Due to its natural emusification properties, **Lecithin Oil** ensures excellent digestibility of the fats and energy. It also helps in improving the digestibility of essential nutrients added to the feed products. **Lecithin Oil**, when mixed in the feed products, promotes the absorption of fat-soluble vitamins.

Lecithin Oil also helps in improving the immune system, increases metabolism efficiency, and enhances growth of the poultry and cattle.

Zinc Oxide

Process Enterprises offers **Zinc Oxide (ZnO)** which is a white colored powder that is insoluble in water. It occurs naturally as the mineral zincite which is further refined and purified to make fine mineral powder.

Zinc Oxide is widely used as an additive in products including feed additives, mineral mixtures, soil nutrients, rubber industries, plastics, ceramics, glass, cement, lubricants, paints, adhesives, sealants, pigments, batteries, ferrites, fire retardants, etc.

Alkyd Resin

We offer Soyabean Oil based **Alkyd Resin** for Paints and Printing Inks.

Alkyd Resin are used in manufacturing of a wide variety of paint products which find applications in decorative paints, maintenance paints, varnish, and contractor paints.

Alkyd Resin is one of the most widely used resin in manufacturing industrial paint products. **Alkyd Resin** based paints provide excellent gloss, good durability, good heat resistance, excellent light resistance, good corrosion resistance, outdoor ageing resistance as well as acid resistance, alkali resistance, salt water resistance, oil resistance, detergent resistance, etc.

soya lecithin

Epoxidized Soyabean Oil

Epoxidized Soybean Oil, also known as, **ESBO**, is a clear to yellow colored liquid that is mainly used as a plasticizer and stabilizer in Poly Vinyl Chloride (PVC) plastics.

Epoxidized Soybean Oil is manufactured by oxidation of Soybean Oil with Hydrogen Peroxide.

We offer **ESBO** in large volumes at a very competitive price. Due to its low cost, **Epoxidized Soybean Oil** is sometimes used as a replacement for Di-Octyl Phthalate (DOP) in some applications.

Epoxidized Soybean Oil we offer is used in Rigid PVC Pipes, PVC Sheets, PVC Films, PVC Shoes as well as in Pesticides as a replacement for Epichlorohydrin.

Process Anti-Oxidant

Process Anti-Oxidant (PAO) is proprietary product offered exclusively by **Process Enterprises**.

It is an Anti-Oxidant used in natural rubber compounding. It prevents auto vulcanization of natural rubber.

PAO offered by us is a very effective and competitive replacement for expensive anti-oxidants like TDQ, etc.
